

# WHAT IS CO-OPERATIVE LEARNING ?

In this factsheet you will have the opportunity to learn more about the coop learning meaning and process: you will find here its fundamental elements and how to make it happen, discovering also all the social skills one can improve while applying this useful learning strategy !

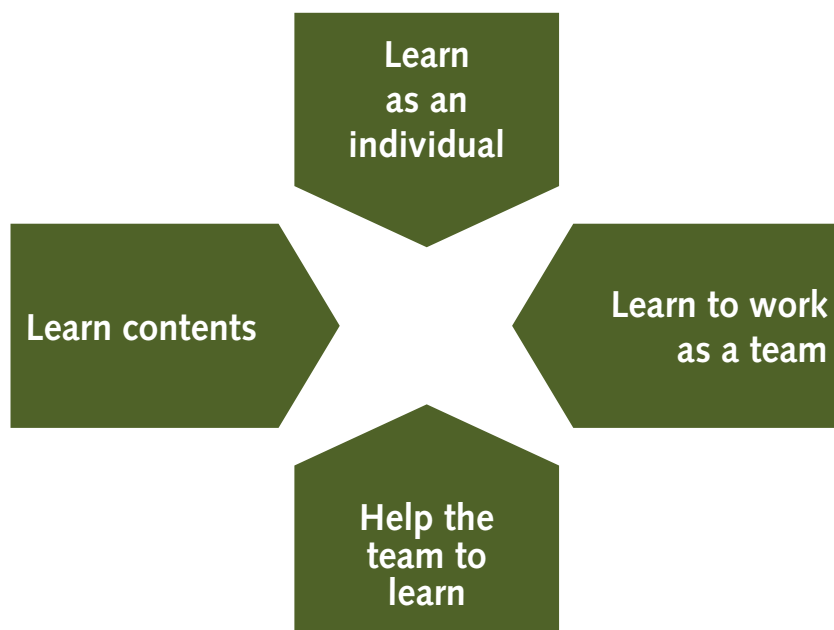

Learning Objectives

Cooperative learning

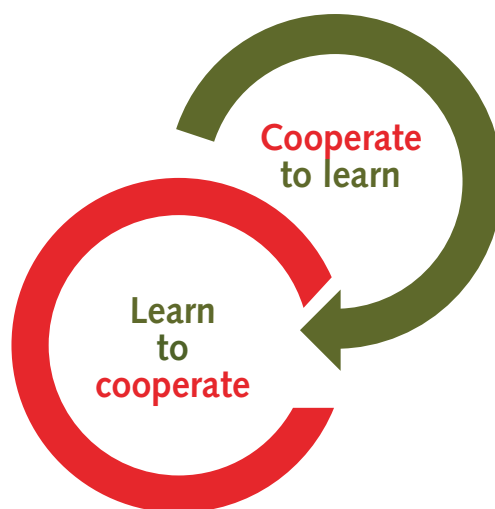

Learning Responsibilities

is a learning strategy in which small groups of students work together on a common task in order to take advantage of their interaction and maximise the learning experience of anyone. Thanks to this learning strategy, the students will learn Objectives and Responsibilities at the same time. The learning process will happen both at individual and at team level because each student is motivated to get involved and play his/her part within the group. The team itself is a learning facilitator and a skills learning instrument.

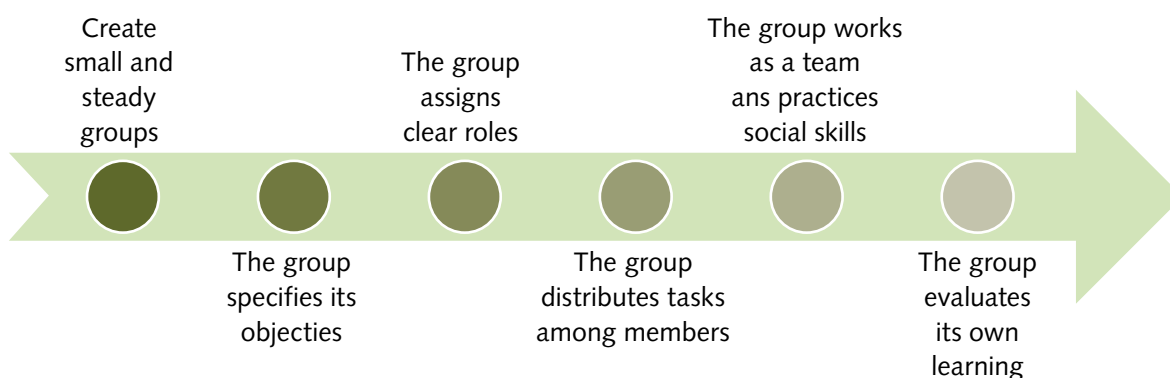

## Foundamental elements

## How to make it happen ?

## Social skills improved
