

LEARNING POINT RESUME

Rif. "What did we learn?" in the document "Step 5 – What did we learn"

This template/track should be used by trainers in order to review the main points of Step 5 and to let students reflect on what they learned and understood from their work.

Tips for trainers :

The following questions are structured to promote an overall reflection of students on the learning points of Step 5, led by the trainer.

The questions are just a guide for the trainer, they can be modified, further detailed according to the tools and methodologies used with students (simulations, activities in team, etc.) and other points can be added in order to assess the learning level and get a feedback from the group.

This track can be useful both for the teacher/trainer who lead the activity but also for other teachers interested in including a cooperative education activity in their classes.

STEP 5 CONTENTS :

- *Project evaluation: results and goals achieved.*
- *Team work evaluation: collaboration, communication, decision making, leadership.*
- *Organisation and figures of the cooperative movement in Europe.*

Questions :

contents

- What did you learn about implementing an entrepreneurial project within a team?
